PROFESSIONAL SUMMARY

Software Engineering student (expected graduation: Dec. 2026) with a Full-Stack profile and operational experience in corporate networks (CNOC Telmex). I develop web and mobile applications using React, Node.js, and Flutter, automate deployments via CI/CD, and integrate generative AI to build end-to-end solutions.

EDUCATION

Universidad Tecnológica de San Juan del Río

B.S. in Software Development and Management Engineering (10th term)

Sep. 2025 – Dec. 2026 (Expected)

Associate Degree (T.S.U.) in Information Technology

Sep. 2023 – Aug. 2025

FEATURED PROJECTS

CodeBridge – Full-stack university platform (in development) [GitHub]

- Collaborate in a 5-person team using SCRUM, developing the frontend in Angular/Ionic and supporting backend architecture in ASP.NET Core.
- Orchestrated deployment on a personal physical server, automating CI/CD pipelines with GitHub Actions and exposing the network via Cloudflare Tunnels.

Inventory 360 – AI-powered inventory SaaS [GitHub]

- Developed a full-stack SaaS (React, Node.js, MongoDB) featuring RBAC, a POS system, and atomic stock deduction.
- Integrated Gemini as an NLU orchestrator to interpret text and voice commands; the backend validates and executes each operation.

UHC Nova – E-sports tournament management platform [GitHub]

- Developed a React SPA and Node.js REST API (Prisma, JWT), and managed deployment on custom hardware.

CashFlow – AI-powered personal finance mobile app [GitHub]

- Developed a mobile app using Flutter and Firebase, featuring budgeting, savings goals, and automated alerts powered by Gemini.

PROFESSIONAL EXPERIENCE

CNOC Telmex – Client: Coppel

May 2025 – Aug. 2025

Network Operator (Intern)

- Diagnosed and resolved Tier 1 LAN/WAN incidents in critical infrastructure, documenting over 50 tickets weekly.
- Managed TCP/IP services (DNS, DHCP, routers, and switches), ensuring operational continuity and verifying high availability using corporate monitoring tools.

LEADERSHIP & AWARDS

CANACINTRA Hackathon – 2nd place overall; built a MES (Manufacturing Execution System) in under 24 hours 2025

International Winter School (Colombia) – Winning project on water harvesting 2024

Artificial Intelligence Club, C.I.T. UTSJR

Nov. 2025 – Present

Founder and President

- Coordinate student teams and organize technical workshops on AI models and process automation.

Universidad Tecnológica de San Juan del Río

Sep. 2024 – Apr. 2025

Networking Workshop Instructor

- Taught hands-on labs to 43 students, increasing the course pass rate by 25%.

SKILLS & LANGUAGES

Programming Languages: TypeScript/JavaScript, C#, Python, Dart, SQL

Frameworks & Databases: React, Angular, Node.js, ASP.NET Core, Express, Flutter, Prisma, MongoDB, PostgreSQL

Infrastructure & DevOps: Docker, GitHub Actions (CI/CD), Cloudflare Tunnels, Linux, TCP/IP

Spoken Languages: Spanish (Native); English (B2, EnglishScore certified)
